Summary

Computer Science undergraduate graduating in 2027 with hands-on experience in backend development, REST APIs, SQL databases, containerization, Kubernetes deployments, and CI/CD workflows. Experienced in developing and testing backend services using Java and Spring Boot, integrating application components, troubleshooting technical issues, and deploying applications using Docker and Kubernetes. Strong foundation in Data Structures, Algorithms, OOP, DBMS, Operating Systems, problem solving, and software engineering practices.

Technical Skills

Languages:	Java, Python, C, SQL
Core:	DSA, OOP, DBMS, Operating Systems, Computer Networks, Problem Solving
Backend:	Spring Boot, REST APIs, Node.js, Express.js, FastAPI
Frontend:	React.js, JavaScript, TypeScript, Tailwind CSS
Databases:	PostgreSQL, MySQL
DevOps/Cloud:	Docker, Kubernetes, Jenkins, CI/CD, AWS, Git
Engineering:	API Integration, Testing, Debugging, Troubleshooting, Requirements Analysis, Agile

Education

Bachelor of Technology in Computer Science Engineering	Sep 2023 – Jun 2027 (Expected)
Koneru Lakshmaiah University	CGPA: 8.85

Experience

Technical Member - KL Radio	Aug 2025 – Present
------------------------------------	--------------------

- Supported development, deployment, and maintenance of a real-time broadcasting platform serving 100+ concurrent listeners with focus on reliability and low-latency delivery.
- Investigated technical issues during live broadcasts, coordinated troubleshooting, and implemented solutions to maintain service continuity.
- Collaborated with broadcasting stakeholders to translate operational requirements into platform features, workflows, and technical improvements.

Software Developer Intern - AICTE EduSkills	Apr 2025 – Jun 2025
--	---------------------

- Developed backend services and REST APIs using Java and Spring-based technologies, working with SQL databases to implement application functionality.
- Tested, integrated, and debugged backend services while identifying implementation issues and resolving API, database, and application-level errors.
- Analyzed application requirements and implemented maintainable solutions through iterative development, validation, and troubleshooting.

Projects

News Aggregator	GitHub
------------------------	--------

- Developed a full-stack news aggregation platform with a Java Spring Boot backend, REST APIs, authentication, and frontend integration for managing and consuming news content.
- Containerized backend and frontend services using Docker and Docker Compose, enabling reproducible builds and multi-service local deployment.
- Created Kubernetes deployment manifests for backend and frontend services and configured Ingress-based routing for containerized application deployment.
- Implemented application security and authentication using Spring Security, integrated database-backed user management, and developed service-layer and repository components using Spring architecture.
- Configured the project for automated software delivery using Git and Jenkins-based CI/CD workflows, supporting repeatable build and deployment processes.

KL Radio Real-Time Broadcasting Platform	klradio.in
---	------------

- Engineered an event-driven real-time communication system using Node.js and Express.js, supporting concurrent connections and developed a Python-WebRTC audio transfer engine achieving approximately 2–3 seconds of streaming latency.
- Developed REST APIs and PostgreSQL-backed services for live shows, scripts, podcasts, student announcements, and real-time song suggestions.
- Implemented role-based access control and access validation while collaborating with broadcasting stakeholders to improve operational workflows and system reliability.

Certifications

AWS Certified Cloud Practitioner	AZ-900 Microsoft Azure Fundamentals	Cambridge Linguaskills
----------------------------------	-------------------------------------	------------------------

Achievements

- Participated in Google Agentathon, gaining hands-on experience building AI agent applications and solving technical problems.
- Senior Technical Member at KL Radio and Core Member of Radio Fiesta, coordinating technical operations across 15+ live shows.
- Architected and launched the KL Radio live broadcasting platform, supporting 100+ concurrent listeners and approximately 2–3 seconds of audio latency.
